rohit-kamatam

Rohit-Doi

Hyderabad, India

OBJECTIVE

Motivated 4th-year B.Tech student specialising in AI & Machine Learning. Experienced in Python-based data analysis, machine learning model development, and building data-driven applications. Eager to apply analytical skills to derive actionable insights from real-world datasets and contribute to impactful, data-driven solutions.

EDUCATION

Malla Reddy College of Engineering and Technology (MRCET)

Hyderabad, India

B.Tech in Computer Science – AI & Machine Learning

2023 – 2027

- **CGPA:** 9.34 (current) | 4th Year
- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Statistics & Applications, Object-Oriented Programming, Computer Organization & Programming

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, Java, C

Web & Backend: FastAPI, Next.js, React, Tailwind CSS, HTML5, CSS3

Databases: PostgreSQL, SQL-based databases

Tools & Platforms: Git, GitHub, Vercel, Google Auth APIs, Google Colab

PROJECTS

Skill Match – AI Resume Analyser & Career Guider | *Python, NLP, FastAPI, Next.js*

- Built an AI-assisted platform that analyses resumes against job descriptions, generates **match scores**, and surfaces strengths, weaknesses, and skill gaps.
- Implemented **data-driven career recommendations** with curated course suggestions based on profile analysis.
- Live: skillmatch12.vercel.app

Passenger Counting in Transport System | *Python, YOLOv8, ResNet18, Computer Vision*

- Built an AI model to **detect, track, and count** passengers in real-time video streams, with polygon-based ROI filtering to improve data accuracy.
- Analysed occupancy trends to support **safety monitoring** – demonstrating ability to derive meaningful insights from raw sensor/video data.
- Currently in progress.

Layout Analysis – Meitei Mayek Script | *Python, Detectron2, Deep Learning*

- **Created and labelled a custom dataset** of document images, performing full data collection, annotation, and preprocessing pipeline.
- Trained a Detectron2 model to classify layout components, iteratively refining results through **data quality improvements** and hyperparameter tuning.
- Currently in progress.

EXPERIENCE

Infosys Springboard

Remote

AI/ML Intern – Internship 6.0, Batch 1

Aug 2025 – Oct 2025

- Developed **SkillMatch**, an end-to-end AI-powered resume matching and skill recommendation tool, addressing real-world challenges in recruitment and talent acquisition.
- Built **intelligent matching algorithms** using ML to accurately align candidate profiles with job requirements.
- Applied **NLP & text analysis** techniques to extract structured insights from unstructured resume data.

ACHIEVEMENTS & CERTIFICATIONS

Achievements

- **Finalist** – NetElixir Aignition 2.0 Hackathon (AI-focused)
- **College-level Finalist** – Smart India Hackathon

Certifications

- Cambridge English **C1 Level** Certification – Cambridge University Press & Assessment
- Web Designing / HTML Workshop (Dcode Soft Tech Solutions)
- Supervised Machine Learning: Regression and Classification – DeepLearning.AI & Coursera
- AWS Academy Graduate – Generative AI Foundations – Amazon Web Services (AWS)
